THE ASTRONOMICAL JOURNAL

271

FOUNDED BY B. A. GOULD

PUBLISHED FOR THE AMERICAN ASTRONOMICAL SOCIETY
BY THE AMERICAN INSTITUTE OF PHYSICS INC.

Editor

G. M. CLEMENCE

Assistant Editors

MARY S. ALBEE

MARRET McCORKLE

Associate Editors

HAROLD F. WEAVER
Leuschner Observatory

FRED L. WHIPPLE
Smithsonian Astrophysical Observatory

JOHN S. HALL
Lowell Observatory

LAURENCE H. ALLER
University of California, Los Angeles

VOLUME 71

1966

NUMBERS 1336–1345

Editorial Office: Yale University Observatory, New Haven, Connecticut 06520

Publications Office: American Institute of Physics, Inc., New York, New York, 10017

Printed at: Lancaster Press, Inc., Lancaster, Pennsylvania

CONTENTS

NUMBER 1336

Final spin states of planets and satellites, by Peter Goldreich
A recursive formulation for computing the coefficients of the time-dependent f and g series solution to the two-body problem, by Victor R. Bond
Rediscussion of Maxwell's Adams prize essay on the stability of Saturn's rings. II, by A. F. Cook and F. A. Franklin
Motion of Halley's comet during the return of 1910, by Pedro E. Zadunaisky
Variation of seeing with zenith distance, by John B. Irwin
Observed millimeter wavelength brightness temperatures of Mars, Jupiter, and Saturn, by C. W. Tolbert
Photometry of XZ CMi, by Robert E. Wilson
Observations of minima and a period study of RZ Cassiopeiae, by Edward W. Burke, Jr., and William W. Rolland
Blue and yellow photoelectric photometry of the eclipsing variable DO Cassiopeiae, by Louis Winkler
Photoelectric observations and orbital solutions of BV 267, by Yoji Kondo
Photoelectric observations and orbital solutions of BV 342, by Yoji Kondo
Wavelength dependence of polarization. VI. Molecular scattering at the skin of interstellar particles, by T. Gehrels
The structure of star clusters. III. Some simple dynamical models, by Ivan R. King
Erratum: Masses, luminosities, colors, and space motions of 228 visual binaries, by Olin J. Eggen
Erratum: Three-color photometry of the components in 228 wide double and multiple systems, by Olin J. Eggen
Erratum: Colors, luminosities, and motions of the nearer G-type stars, by Olin J. Eggen
Erratum: Moment equations in galactic dynamics, by Ivan R. King
Erratum: The structure of star clusters. II. Steady-state velocity distributions, by Ivan R. King

NOTICE:
Death of Dirk Brouwer

NUMBER 1337

Limiting orbits around the equilateral centers of libration, by André Deprit
Numerical determination of short-period Trojan orbits in the restricted three-body problem, by Edson F. Goodrich
Analytical continuation and first-order stability of the short-period orbits at L_4 in the sun–Jupiter system, by André Deprit and Julian Palmore
A new class of periodic solutions of the three-dimensional restricted problem, by William H. Jeffreys
Atmospheric extinction by dust particles as determined from three-color photometry of the lunar eclipse of 19 December 1964, by Satoshi Matsushima, John R. Zink, and James E. Hansen
Wavelength dependence of polarization. VII. Interstellar polarization, by T. Gehrels and A. S. Meltzer
Standard stars for photoelectric Hβ photometry by D. L. Crawford and Jeannette Mander
Classical Cepheids with companions. I. Delta Cephei, by J. D. Fernie
Parallax and orbital motion of the astrometric binary α Ophiuchi from plates taken with the Allegheny 30-in. Thaw refractor and the Sproul 24-in. refractor, by Sarah Lee Lippincott and Nicholas Wagman
Periods for 11 new variable stars in Sagittarius, by Dorrit Hoffleit
New variable stars in the Large Magellanic Cloud, by Paul E. Hodge and Frances W. Wright
KO Aquilae as an example of systems with undersize secondaries in pre-main sequence contraction, by Ian W. Roxburgh
The distribution in depth of extragalactic radio sources, by G. C. McVittie and Leonard Schusterman
Study of Venus by cw radar—1964 results, by R. L. Carpenter
Erratum: Icarus and relativity, by R. H. Dicke

NUMBER 1338

Abstracts of Papers presented at the 120th Meeting of the American Astronomical Society, held 27–30 December 1965 at the University of California, Berkeley, California
A practical solution of the atmospheric dispersion problem, by George W. Simon
Daylight observations of the 1965 f comet at the Sacramento Peak Observatory, by G. Wm. Curtis and the Sacramento Peak Observatory Staff
Flare-initiated filament oscillations, by Harry E. Ramsey and Sara F. Smith
The orbit of comet 1959 IX (Mrkos), by G. Van Biesbroeck
A sensitive photometric luminosity discriminant for late-type dwarf and giant stars, by John S. Neff
Surface photometry of the sculptor dwarf galaxy, by Paul W. Hodge
Four-color and Hβ photometry of open clusters. I. The Hyades, by D. L. Crawford and C. L. Perry
Colors of stars in the nucleus of Messier 53, by James Cuffey
The association OB 78 in the Andromeda nebula, by Sidney van den Bergh
Hubble's variable nebula NGC 2261, by Hugh M. Johnson
Erratum: The influence of high-order zonal harmonics on the motion of an artificial satellite without drag, by Giorgio E. O. Giacaglia

NOTICE:
Index and catalogue of double stars, by K. Aa. Strand

NUMBER 1339

OBSERVATORY REPORT: Kitt Peak–Cerro Tololo Inter-American
A theorem on formal stability in the satellite orbit problem, by Stephen P. Diliberto
Satellite motion for arbitrary eccentricity and inclination around the smaller primary in the restricted three-body problem, by M. C. Eckstein, Y. Y. Shi, and J. Kevorkian
Earth deceleration from ancient solar eclipses, by David R. Curott

Intensity and color gradients in the earth's umbra on 19 December 1964, by Howard L. Cohen, H. Melvin Dyck, and Arthur Young ... 270
A study of factors affecting seeing at the David Dunlap Observatory, by Robert D. McClure ... 273
The structure of star clusters. IV. Photoelectric surface photometry in nine globular clusters, by Ivan R. King ... 276
Infrared photometry of Beta Persei, by Kwan-yu Chen and Ernest G. Reuning ... 283
Motions of the interstellar cloud in Serpens and Libra, by S. J. Goldstein, Jr., and B. J. Welch ... 297

NUMBER 1340

Use of the energy integral to evaluate higher-order terms in the time history of satellite motion, by M. Eckstein, Y. Shi, and J. Kevorkian ... 301
Some dynamical systems of two degrees of freedom in celestial mechanics, by William H. Jeffreys ... 306
Transformations of the lunar coordinates and orbital parameters, by W. J. Eckert, M. J. Walker, and D. Eckert ... 314
An improved theoretical lunar photometric function, by Bruce Hapke ... 333
The light variation and orbital elements of W Ursae Majoris, by L. Binnendijk ... 340
Photometric methods for measuring the metal content of K giants, by George Wallerstein and H. L. Helfer ... 350
Wavelength dependence of polarization. VIII. Interstellar polarization, G. V. Coyne, S. J., and T. Gehrels ... 355
457 new star clusters of the Large Magellanic Cloud, by Paul W. Hodge and John A. Sexton ... 363
Survival of binary star orbits following rapid mass loss, by Malcom P. Savedoff ... 369
Supernova of +1006, by R. Minkowski ... 371
Structure of 3C444 from observations of lunar occultations, by Marvin L. De Jong ... 373

NUMBER 1341

Abstracts of Papers presented at the 121st Meeting of the American Astronomical Society held 28–31 March 1966 at Hampton, Virginia ... 377
On the existence of a new integral in the restricted three-body problem, by G. Bozis ... 404
On the isolating character of the "third" integral in a resonance case, by Basil Barbanis ... 415
Spin-orbit coupling in the solar system, by Peter Goldreich and Stanton Peale ... 425
Lunar disturbing function, by D. Barton ... 438
Observations of comets, minor planets, and satellites, by Elizabeth Roemer and Richard E. Lloyd ... 443
UBV photometry of RR Lyncis, by Albert P. Linnell ... 458
Search for new northern Wolf-Rayet stars, by C. B. Stephenson ... 477
Low-luminosity members of the Hyades cluster, by W. F. van Altena ... 482
Trigonometric parallaxes of 36 stars determined by photography with the McCormick 26-inch refractor, by V. Osvalds ... 513
Light curves of three new variables in Messier 53, by James Cuffey ... 514
Mean absolute magnitude for stars of spectral class F, by S. W. McCuskey and R. H. Rubin ... 517
Parallax and mass ratio of the visual binary Hu 1176 from photographs taken with the 24-in. Sproul refractor, by Peter van de Kamp and Sandra Moore ... 524
Eclipsing system RX Arietis, by George E. McCluskey, Jr. ... 527
Eclipsing system UV Leonis, by George E. McCluskey, Jr. ... 536
Concerning Brouwer's paper on the Kirkwood Gaps, by Dirk Brouwer and William H. Jeffreys ... 543

NOTICE:
The Annie J. Cannon Prize ... 544

NUMBER 1342

A solution of the regularized equations of motion of the restricted problem, by David A. Pierce ... 545
Applications of a solution of the regularized equations of motion of the restricted problem, by David A. Pierce ... 562
Periodic orbits in the three-dimensional three-body problem, by William H. Jefferys ... 566
Quasi-periodic solutions for the three-body problem, by W. H. Jefferys and J. Moser ... 568
Modified Encke special perturbation method, by W. T. Kyner and M. M. Bennett ... 579
Remark on a modified Encke special perturbation method, by W. T. Kyner ... 583
Dynamical evolution of the Neptunian system, by Thomas B. McCord ... 585
Observations of comets, minor planets, and Jupiter VIII, by Elizabeth Roemer, Maryanna Thomas, and Richard E. Lloyd ... 591
Geocentric initial conditions of trajectories originating at the moon's surface, by Barbara E. Shute ... 602
Photoelectric Hβ photometry for B stars in the Orion Belt region, by D. L. Crawford and J. V. Barnes ... 610
Metal-to-hydrogen ratios in the galaxy as indicated by narrow-band photometry of Cepheids, by John A. Williams ... 615
Procedure of photometry for elliptical galaxies, by G. O. Abell and Dimitri M. Mihalas ... 635
Photometric elements of the eclipsing binary EK Cephei, by E. G. Ebbighausen ... 642
Parallaxes of three late-type dwarfs, by Wayne Osborn and Ching-Yew Yang ... 647
Radio spectrum of an active solar region determined from the 20 July 1963 eclipse, by John P. Castelli and John Clemens ... 652

NUMBER 1343

Formal solution in the problem of small divisors, by Boris Garfinkel ... 657
On constructing formal integrals of a Hamiltonian system near an equilibrium point, by F. G. Gustavson ... 670
Resonance cases and small divisors in a third integral of motion. III, by George Contopoulos and Michael Moutsoulas ... 687
Variation of lunar eclipse brightness and its association with the geomagnetic planetary index K_p, by Satoshi Matsushima ... 699
Stellar orbits in a time-varying gravitational field, by Myron Lecar ... 706
Photoelectric Hβ photometry for 1217 stars brighter than $V=6.5$ mag, by D. L. Crawford, J. V. Barnes, B. Q. Faure, J. C. Golson, and C. L. Perry ... 709
UVB photometry of 1055 stars, by W. L. Sanders ... 719
Spectroscopic orbit of the eclipsing binary EK Cephei, by E. G. Ebbighausen ... 730
Classical Cepheids with companions. II. Polaris, by J. D. Fernie ... 732
Proper motions of stars in the open cluster M37, by A. R. Upgren ... 736
1414 Mc/sec Jupiter observations, by A. C. Miller and J. Griffin ... 744
Infrared spectrum of Saturn's ring, by L. Mertz and I. Coleman ... 747
Astronomical photoelectric spectrometer, by Lawrence Mertz ... 749
Erratum: Surface photometry of the Sculptor dwarf galaxy, by Paul W. Hodge ... 752
ANNOUNCEMENT: Availability of National Radio Astronomy Observatory equipment ... 752

NUMBER 1344

OBSERVATORY REPORTS 75
Abstracts of Papers presented at the 122nd Meeting of the American Astronomical Society, held 25–28 July 1966 at Ithaca, New York 84
von Zeipel method and the two-variable expansion procedure, by J. Kevorkian 87
Regularizing transformations of the Jacobian integral, by Vector Szebehely and David A. Pierce 88
Cassini's second and third laws, by G. Colombo 89
Radar observations of Venus at 23 cm in 1965/1966, by J. V. Evans, R. A. Brockelman, E. N. Dupont, L. B. Hanson, and W. A. Reid 89
Radar observations of Venus at 3.8 cm wavelength, by J. V. Evans, R. P. Ingalls, L. P. Rainville, and R. R. Silva 90
Colors of nine Cepheids in the S.A. 193 section of the southern Milky Way, by Margaret Olmsted 91
Luminosity classification of dwarf galaxies, by Sidney van den Bergh 92
Flux densities of radio sources at 5 Gc/sec, by A. Maxwell and R. Rinehart 92
NEW BOOKS RECEIVED 93

NUMBER 1345

FURTHER REPORTS OF OBSERVATORIES 93
The ultraviolet dwarfs: a new class of degenerate stars, by Richard Stothers 94
Solution of the restricted problem of three bodies by power series, by Victor Szebehely 96
Solution of Birkhoff's equations of the regularized restricted problem, by Carol Williams 97
Further periodic solutions of the three-dimensional restricted problem, by William H. Jefferys and E. Myles Standish, Jr. 98
The motion of a lunar satellite, by Claus Oesterwinter 98
A study of reflection nebulae, by Sidney van den Bergh 99
The association II Pup and the classical Cepheid AQ Pup, by J. D. Fernie, W. A. Hiltner, and Robert P. Kraft 99
Comparison of the La Plata Star Catalogue of absolute declinations LPl_{50} with the third fundamental catalogue of the Berliner Astronomischen Jahrbuch (FK3), by Sergejs J. Slaucitajs 100
A laboratory astrosensitometer, by A. G. Millikan and J. C. Marchant 100
Micrometer measures of wide M-type double stars, by W. L. Sanders 100
Orbital solutions of V499 Scorpii and RT Sculptoris, by Beverly B. Bookmyer 101
Alpha and Proxima Centauri, by Charles Gasteyer 101
Results of the first infrared astronomical rocket flight, by Martin Harwit and D. P. McNutt, K. Shivanandan, and B. J. Zajac 102
Radio observations of CTA 102, by Yervant Terzian 103
Erratum: Survey of spectra of southern eclipsing binaries, by David M. Popper 103
AUTHOR INDEX TO VOLUME 71 103
SUBJECT INDEX TO VOLUME 71 105
